Slight change of plans. Just talked to the Lockmaster at L&D3 (William O Huske) and he said he could lock us through tomorrow AM. He just got power restored to the Lock gates yesterday. As of now it is a go for us. I told him I intend to be there around 7 AM or so. He said he would be there around 7:30. His name is Buddy cell Personal Phone / Ex. 6 Let's plan to meet there at around 7 AM for our sampling.

Mark,

I will aim to be at the boat access by 6:45am. That way we can be on the water as soon as possible.

Zack

I was intending to leave from Apex to be at the river around 7 AM. I need to be back to Durham for 11:15 to 11:30 or so. The location of the boat ramp is the Fayetteville Boating Access Cape Fear river. We will need to motor down to the area with the stars. I estimate about a 15 mile one way trip downriver to the sampling site. That concerns me a bit.

Subject: Sampling on Tuesday

Hi Mark and Zack,

Thanks for getting a vehicle/boat for Tuesday. Zack will be helping collect the samples. I will be helping with grab samples from the river so will not be on the boat with you guys. I wanted to send an email including both of you so that you can touch base and coordinate, if need be. Are you still planning to leave directly from your house in Apex? If so, we can meet you there at 7. Where would you like Zack to meet you? I know you mentioned the boat put-in location is upstream of the Huske Dam.

Please let me know if either of you have any questions.

Thank you both for your help!

Hillary
